Team Working Agreement

Course: COMP 3350
Project Name:
Team Name: The Git Girls
Date Created: 01/15/2026

Team Members

Name	Program / Year (optional)	Preferred Name / Pronouns (optional)
Zehra Rizvi	CS 3rd Year	Zehra - she/her
Sujana Islam Suhi	CS 3rd Year	Sujana - she/her
Khadijat Folarin	CS 3rd Year	Khadijat - she/her
Alice Pham	CS 4th Year	Alice - she/her
Krissy Tran	CS 3rd Year	Krissy - she/her

---

1. Shared Team Goals (can add more than 3)

As a team, we agree that our shared goals for this project are:

- Get used to using Git / Using Git regularly
- Minimize tech debt as much as possible
- Communicating well/regularly
- Equal workload + equal input from all group members

(Examples: learning specific technical skills, producing a high-quality final product, maintaining low stress, equal workload, meeting deadlines early, etc.)

---

2. Individual Goals

Each team member lists their personal goals for this project.

Team Member	Individual Goals
Zehra	Finish assigned material well before the deadline so we have time to double check our material
Sujana	Get comfortable with building software/connecting with more people
Khadijat	Learn how to build an android app and get better at writing good code
Alice	Be more comfortable with coding
Krissy	Manage my time better to be able to better accommodate the deadlines of my group members

---

3. Roles and Responsibilities

Roles may rotate unless otherwise specified. Note: none of these are developer roles. You are all responsible for development as well and these are just recommended additional roles to define.

Role	Description	Assigned To
Project Coordinator	Organizes meetings, tracks deadlines	Alice
Technical Lead	Oversees technical decisions and code quality	Zehra
Documentation Lead	Maintains README/docs	Khadijat
GitLab Manager	Manages repo structure, merges, issues	Sujana
Quality Checker	Reviews work before submission	Krissy

If responsibilities are shared or rotated, describe how below:

For “hard” tasks, we will split them 5 ways so that we can all work on them

---

4. Communication Plan

Primary communication channel(s): Discord
(e.g., Discord, Slack, WhatsApp, email)

Expected response time:

- Weekdays: 1 business day
- Weekends: N/A
- During critical deadlines: 1 business day

When is escalation required?
(e.g., no response after 24–48 hours, missed meeting, blocked progress)

After 2 business days, missing meetings without informing any group members, and when progress is blocked without correspondence

---

5. Meetings

Regular meeting time(s): Monday 8pm - 9pm
Meeting platform/location: Discord

Meeting norms (check all that apply):

- ✓ Agenda shared in advance
- ✓ Start/end on time
- ✓ Cameras on (if online)
- ✓ Action items documented
- ✓ Everyone contributes

What happens if someone cannot attend?

Communicate to the group before a meeting that we can't attend, hopefully in a reasonable amount of time + meeting members will share meeting minutes/notes.

---

6. Work Expectations

- How tasks will be assigned (e.g., issues, task board): Members can volunteer to do tasks they feel confident in/Tasks will be assigned based on each member's strengths and skills. For unassigned/difficult tasks, the team will discuss and agree on responsibilities together.
- Definition of "done" for a task: We will set specific criteria for the "doneness" of a task, then when all of the criteria is met, that task will be "done"
- Expectations around code quality / documentation: Code quality and documentation should be written in a "write code you would like someone else to be able to read" fashion, e.g. variable names should be descriptive, code segments should be commented as needed, line spacing is reasonable, etc.

---

7. Conflict Resolution & Unmet Expectations

If conflict arises or expectations are not met, we agree to follow this process **in order**:

1. Directly converse to the member(s) directly and respectfully
2. Discuss the issue as a team -> hold a vote (e.g. discord poll) as a group if the issue still isn't resolved
3. Go to Lauren if the issue is still not resolved/instructor action is needed to resolve the issue.

(Examples: direct conversation → team discussion → instructor escalation)

How will concerns be raised respectfully?

Using respectful language, avoiding being passive aggressive, being direct about a concern, avoiding making negative assumptions, giving benefit of the doubt, and making sure team members are going about what they say they will do.

---

8. Responsible GenAI Use

As a team, we have discussed the responsible and ethical use of Generative AI tools (e.g., ChatGPT, Copilot) for this project. We agree on the following shared norms:

Allowed uses of GenAI in this project include:
• Improving/debugging existing code.
• Brainstorming/refining general project ideas, features, user stories, etc.
• Explaining concepts/code.

Disallowed uses of GenAI in this project include:
• Using AI as the main tool for work. (e.g. making AI generate code from scratch & using it without reviewing it)
• Sharing sensitive data
• Following AI suggestions without being able to explain it.

Key risks we have identified related to GenAI use (e.g., correctness, over-reliance, fairness, integrity):
• Over-reliance
• Copying without citations
• Data leakage/sharing sensitive information.

How our team will ensure transparency, accountability, and shared understanding of AI-assisted work:

• Clearly communicating when and how AI is used before submitting each iteration.
• Discussing AI-generated output together before submission to ensure shared understanding.
• Documenting usage of AI in code comments to promote transparency of AI-assisted work.

---

9. Accountability

If a team member repeatedly misses deadlines or responsibilities, the team will:

- Team will discuss concerns with the member and reset expectations and internal deadlines for them, and depending on severity, will be reflected in the peer review.
- If the issue becomes repeated, tasks will be reassigned and our instructor will be notified.

(Be explicit — vague answers are not acceptable.)

---

10. Agreement

By signing below, we confirm that we have discussed this document together and agree to follow it.

Name	Signature	Date
Sujana Islam Suhi	S.S	January, 19th 2026
Khadijat Folarin	K.F	January, 19th 2026
Zehra Rizvi	Z.R	January 16th 2026
Krissy Tran	K.T.	January 16, 2026
Alice Pham	A.P	January 16, 2026

Submission Instructions:
Upload this document to your **GitLab repository** once the repo has been created.
